Short Summaries of Studies:

1.Study Report – Cooling lubricants – test on free formaldehyde **(SMN 41210)**

Result: test item less than 0.1 % free formaldehyde.

2.Study report – Grotan – test on free formaldehyde **(SMN 18537)**

Result: test item less than 0.05 % free formaldehyde.

3.Concentration of formaldehyde in ambient air by addition of ”grotamar 71” into diesel fuel tanks (**MBO_EX_in-fuel_refilling)**

Result: exposure below 0.1 ppm.

4.Measurements of Formaldehyde in the air of a production room by use of the bactericide „Lubrizol CONTRAM MBO“ or „Grotan OX, Schülke und Mayr“ (**MBO_EX_MWF_long-term)**

Result: long term values are far below 0.4 ppm.

5.Formaldehyde measurements in the ambient air of a production facility by the use of “Grotan OX, Schülke und Mayr“ (**MBO_EX_MWF_short-term)**

Result: short-term values are far below 0.4 ppm.
