DALIC Metallizing on wheel seat of railways axles

Metallizing of axles wheel seat with DALIC Nickel-Cobalt NCB

Those axles have a workload of 30 MT per axle

DALIC application was performed on wagons and locos axles for Spoornet in South Africa. About 2600 axles have been coated on wheel seats.
60000 axles were also plated on bearing journals and 110000 bearing plated in the cone.
