## 1. ADMINISTRATIVE INFORMATION

### 1.1. Trade name(s) of the product

Trade name(s)	Protect Home Express
---------------	----------------------

### 1.2. Authorisation holder

Name and address of the authorisation holder	Name	SBM DEVELOPPEMENT
	Address	60 chemin des Mouilles 69130 Ecully France
Authorisation number		IE/BPA 70734
<i>R4BP asset number</i>		IE-0020399-0000
Date of the authorisation		17/06/2013
Expiry date of the authorisation		30/06/2026

### 1.3. Manufacturer(s) of the product

Name of manufacturer	RENTOKIL - INITIAL SUPPLIES
Address of manufacturer	Webber Road, Knowsley Ind. Park L33 7SR Kirkby, Merseyside United Kingdom of Great Britain and Northern Ireland (the)
Location of manufacturing sites	Webber Road, Knowsley Ind. Park L33 7SR Kirkby, Merseyside United Kingdom of Great Britain and Northern Ireland (the)

Name of manufacturer	IRIS
Address of manufacturer	1126 A, avenue du Moulinas, route de St Privas 30340 Salindres France
Location of manufacturing sites	1126 A, avenue du Moulinas, route de St Privas 30340 Salindres France

### 1.4. Manufacturer(s) of the active substance(s)

Active substance	alphachloralose
Name of manufacturer	SBM Développement
Address of manufacturer	60 Chemin des Mouilles 69130 Ecully France
Location of manufacturing sites	Sarex OverSeas - 501,502 Waterford, C Wing - C.D. - Barfiwala Marg - Juhu Lane - Andheri (W) 400058 Mumbai India

---

## 2. PRODUCT COMPOSITION AND FORMULATION

### 2.1. Qualitative and quantitative information on the composition of the product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
alphachloralose	(R)-1,2-O-(2,2,2-Trichloroethylidene)- α-D-glucofuranose	active substance	15879-93-3	240-016-7	4

### 2.2. Type(s) of formulation

RB Bait (ready for use)

---

### 3. HAZARD AND PRECAUTIONARY STATEMENTS

Hazard statements	H410: Very toxic to aquatic life with long lasting effects.
Precautionary statements	

## 4. AUTHORISED USE(S)

### 4.1. Use description

**Table 1. Non-professional use against mice**

Product type	PT14: Rodenticides
Where relevant, an exact description of the authorised use	VII.2 Health protection VII.3 Material protection (e.g. historical buildings, technical objects)
Target organism(s) (including development stage)	Scientific name: <i>Mus musculus</i> Common name: house mouse Development stage: All
Field(s) of use	indoor use  IV.1 Indoor use
Application method(s)	Method: bait application  Detailed description: VI.2.1 In bait stations (covered application)
Application rate(s) and frequency	Application Rate: Up to 10 g of bait in a mouse bait station. Bait stations every 3 metres.  Dilution (%): 0  Number and timing of application: Prefilled, commercially available, single use, tamper-resistant bait stations are authorised for indoor use against mice. Bait stations contain up to 10 g bait. Maximum bait point size is 10g. Bait stations are manually placed in the rodent-infested area in covered and protected positions at distances of no more than 3 metres apart. •Bait should be laid for periods of at most 7 - 10 days.
Category(ies) of users	general public (non-professional)
Pack sizes and packaging material	Block, Bait , 5 g Cardboard outer packaging containing one or two prefilled polypropylene tamper-resistant bait boxes, each bait box containing one or two 5 g bait blocks See PAR

## **5. GENERAL DIRECTIONS FOR USE<sup>1</sup>**

### **5.1. Instructions for use**

For use indoors only. Bait should be laid for periods of at most 7 - 10 days. Keep locked up and out of reach of children. Prevent access to bait by children, birds and non-target animals (particularly dogs, cats, pigs and poultry). Baits must be securely deposited in a way so as to minimize the risk of consumption by other animals or children. Where possible, secure baits so that they cannot be dragged away. Search for and remove dead rodents at frequent intervals during treatment, at least as often as when baits are checked and/or replenished. Due to the action of this rodenticide this may need to be as often as every few hours.

Tamper-resistant commercially available bait stations (pre-filled or refillable) are authorised. Bait stations are manually placed in the rodent infested area. Ideally bait stations should be fixed to the ground. The product must never be placed indiscriminately.

### **5.2. Risk mitigation measures**

For use indoors only. Bait should be laid for periods of at most 7 - 10 days. Keep locked up and out of reach of children. Prevent access to bait by children, birds and non-target animals (particularly dogs, cats, pigs and poultry). Baits must be securely deposited in a way so as to minimize the risk of consumption by other animals or children. Where possible, secure baits so that they cannot be dragged away. Search for and remove dead rodents at frequent intervals during treatment, at least as often as when baits are checked and/or replenished. Due to the action of this rodenticide this may need to be as often as every few hours.

Tamper-resistant commercially available bait stations (pre-filled or refillable) are authorised. Bait stations are manually placed in the rodent infested area. Ideally bait stations should be fixed to the ground. The product must never be placed indiscriminately.

### **5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment**

Excessive concentrations may cause nervous system depression, headache and weakness leading to unconsciousness. No antidote. Treat symptomatically

### **5.4. Instructions for safe disposal of the product and its packaging**

Dispose of dead rodents in accordance with local requirements. Remove all baits after treatment and dispose of them in accordance with local requirements

### **5.5. Conditions of storage and shelf-life of the product under normal conditions of storage**

Shelf life of up to 2 years supported.

---

<sup>1</sup>Instructions for use, risk mitigation measures and other directions for use under this section are valid for any authorised uses.
