

Justification for removing a substance from CoRAP prior to evaluation

Substance Name (public name): 3-({[(4-methylphenyl)sulfonyl]carbamoyl}amino)phenyl 4-methylbenzenesulfonate

EC Number: 432-520-2

CAS Number: 232938-43-1

Authority: Belgium

Date: 22/03/2022

The priority for evaluating the substance has been reconsidered based on:

| | |
|--|--|
| <input checked="" type="checkbox"/> | The initial hazard ground of concern has been verified and considered of low priority |
| <p>Originally the substance was placed on CoRAP for the following initial grounds of concerns:</p> <ul style="list-style-type: none"> • Suspected reprotoxic • Potential endocrine disruptor <p>Outcome of compliance check final decision requesting further information (CCH-D-2114484966-29-01/F) became available and was assessed.</p> <p>The results from the conducted pre-natal developmental toxicity study (OECD TG 414) in Wistar rats were not supporting the concern of Pergafast 201 in regard of suspected CMR potential and endocrine disruptor.</p> <p>Further, literature (Reale et al. 2020) on exposure data revealed that Pergafast 201 does not penetrate human skin.</p> <p>According to these newest results we would suggest to withdraw Pergafast 201 from the CoRAP list.</p> | |

| | |
|--------------------------|---|
| <input type="checkbox"/> | The initial exposure/risk ground of concern has been verified and considered of low priority |
| | |

| | |
|-------------------------------------|---|
| <input checked="" type="checkbox"/> | The generation of information under Substance Evaluation is considered of low priority because |
| | <input type="checkbox"/> Already ongoing or implemented regulatory risk management process(es) |
| | <input type="checkbox"/> Registrants' (voluntary) action addresses concern |
| | <input checked="" type="checkbox"/> Other: |
