

REACH Registration statistics

All Countries *

Data as of: 31/12/2021

* EEA (EU27, Norway, Iceland and Liechtenstein) + UK(NI)

Overall Summary

REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	100 679	22 818	15 718

Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	76 451	12 803	14 925
registered as intermediate	19 280	9 612	2 566
<i>Transported isolated intermediates</i>	14 848	7 042	2 384
<i>On-site isolated intermediates</i>	5 511	4 025	783
NONS Notifications	6 056	3 617	-
<i>of which have been claimed</i>	2 877	2 305	500

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	90 019	16 768	15 406

REACH Registration statistics

Denmark

Data as of: 31/12/2021

Overall Summary

REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	695	537	134

Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	466	327	129
registered as intermediate	118	117	13
<i>Transported isolated intermediates</i>	77	76	11
<i>On-site isolated intermediates</i>	56	56	6
NONS Notifications	113	101	-
<i>of which have been claimed</i>	16	15	9

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies

Registrations	2 055	995	668

Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	1 775	788	655
registered as intermediate	292	258	57
<i>Transported isolated intermediates</i>	201	184	52
<i>On-site isolated intermediates</i>	129	115	21
NONS Notifications	7	7	-
<i>of which have been claimed</i>	6	6	6

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).
