Summary of product characteristics for a biocidal product

Product name: Kalaguard® SB

Product type(s): PT06 - Preservatives for products during storage (Preservatives)

Authorisation number: 2019-08-05-B01

R4BP 3 asset reference number: MT-0021299-0000

Administrative information

1.1. Trade names of the product

Kalaguard® SB		

1.2. Authorisation holder		
Name and address of the	Name	LANXESS Chemical B.V.
authorisation holder	Address	Montrealweg 15 3197 KH ROTTERDAM Netherlands
Authorisation number	2019-08-05-B01	
R4BP 3 asset reference number	MT-0021299-0000	
Date of the authorisation	05/08/2019	
Expiry date of the authorisation	01/08/2029	

1.3. Manufacturer(s) of the biocidal products

Name of the manufacturer	LANXESS Chemical B.V.
Address of the manufacturer	Montrealweg 15 3197 KH Rotterdam Netherlands
Location of manufacturing sites	Montrealweg 15 3197 KH Rotterdam Netherlands

1.4. Manufacturer(s) of the active substance(s)

Active substance	1423 - Sodium benzoate
Name of the manufacturer	LANXESS Chemical B.V.
Address of the manufacturer	Montrealweg 15 3197 KH Rotterdam Netherlands
Location of manufacturing sites	Montrealweg 15 3197 KH Rotterdam Netherlands

2. Product composition and formulation

2.1. Qualitative and quantitative information on the composition of the biocidal product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
Sodium benzoate		Active Substance		208-534-8	100

2.2. Type of formulation

DP - Dustable powder

3. Hazard and precautionary statements

Hazard statements	Causes serious eye irritation.
Precautionary statements	Wash hands thoroughly after handling. Wear eye protection.
	IF IN EYES:Rinse cautiously with water for several minutes.Remove contact lenses, if present and easy to do. Continue rinsing.
	If eye irritation persists:Get medical advice. If eye irritation persists:Get medical attention.

4. Authorised use(s)

4.1 Use description

Use 1 - In-can preservative

Field(s) of use

Indoor

Indoor

In-can preservation of dishwashing liquids, laundry products and cleaning liquids.

Application method(s)

Method: Automated or manual dosing during production Detailed description:

Preservation is intended to protect the matrix up to the consumer phase.

The product is ready-to-use.

Application rate: 5-29.5 g sodium benzoate per L matrix (corresponding to 0.42-2.5%

Assure that the final formulation does not exceed pH 6, since the preventive properties of the active substance against growth of microorganisms diminishes at pH above 7. The dose strongly depends on the formulation and intended use of the product to which the preservative is added. Therefore, the user should determine dosage requirements for their specific matrix/system to be preserved. The lowest effective dose should be used.

Pack sizes and packaging material	Bags 25 kg, polyethylene Bags 500 kg, 650 kg, 1000 kg, polypropylene
Category(ies) of users	Industrial
Application rate(s) and frequencies	Application Rate: 5-29.5 g sodium benzoate per L matrix (corresponding to 0.42-2.5% benzoic acid) Dilution (%): Not applicable. Number and timing of application: Frequency: The product is added to the articles to be preserved once during their manufacture. Filling of dosage systems used to add the product to the matrix is dependent on production schedule and layout of the factory, but typically in the range of once a week/month to multiple times per day.

See general directions for use
5. General directions for use
5.1. Instructions for use
The product Kalaguard® SB is intended to be used as an in-can preservative (PT6) in detergents, including dishwashing liquids, liquid laundry detergent and cleaners. The product is added to the articles needed to be preserved by either automated or manual dosing, to achieve the concentration of 5-29.5 g sodium benzoate per L matrix (corresponding to 0.42-2.5% benzoic acid) in the final product.
The dose strongly depends on the formulation and intended use of the product to which the preservative is added. Therefore, the user should determine dosage requirements for their specific matrix/system to be preserved. The lowest effective dose should be used.
Assure that the final formulation does not exceed pH 6, since the preventive properties of the active substance against growth of microorganisms diminishes at pH above 7.
The activity increases with decreasing pH and diminishes above pH 7, as the active substance is the protonated benzoic acid, and the ratio protonated/deprotonated increases at low pH.
E 2. Dick mitigation massures
5.2. Risk mitigation measures
As a precaution to control dust explosion potential: eliminate ignition sources (e.g., sparks, static build-up, excessive heat, etc.), use spark-proof tools and equipment and prevent accumulation of dust (e.g., well-ventilated conditions, promptly vacuuming spills, cleaning overhead horizontal surfaces, etc.).
Wash hands thoroughly after handling. Wear eye protection.
Wear gloves during mixing and loading while adding Kalaguard® SB to the articles to be preserved (glove material to be specified by the authorisation holder within the product information).

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Likely direct or indirect adverse effects: • Eyes, mucosal, respiratory and gastrointestinal tract irritation.
Description of first aid measures: General: If irritation or other symptoms occur or persist from any route of exposure, remove the affected individual from the area: get medical advice/attention Eye contact: Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention
Ingestion: Never give anything by mouth to an unconscious person. Rinse out the mouth with water. Get medical advice/attention.
Environmental precautions:
Do not flush product into public sewer, water systems or surface waters.
5.4. Instructions for safe disposal of the product and its packaging
Dispose of unused contents (incineration or landfill) in accordance with national and local regulations. Dispose of container in accordance with national and local regulations. Ensure the use of properly authorized waste management companies, where appropriate.
5.5. Conditions of storage and shelf-life of the product under normal conditions of storage
Shelf-life: 2 years
